What's new with BlueXP backup and recovery for VMs

Learn what's new in BlueXP backup and recovery for VMs.

18 January 2024

Enhancements to BlueXP backup and recovery for VMs

The following are the features that are supported in BlueXP backup and recovery for VMs 1.1:

- Mount and unmount datastores
- Attach and detach VMDKs
- Restore virtual machines to alternate location
- Enable Snapshot Locking to ensure Snapshot copies are not tampered until a specified time.

13 July 2023

BlueXP backup and recovery for VMs 1.0 is now GA

You can protect data on your virtual machines by using BlueXP backup and recovery for VMs. You can back up datastores on Amazon FSx and restore virtual machines to their original location.

This solution is specifically for Virtual Machines and Datastores on VMware Cloud on AWS and Amazon FSx for NetApp ONTAP.

BlueXP backup and recovery for virtual machines on Amazon FSx

Known limitations

Known limitations identify functions that are not supported by this release of the product, or that do not interoperate correctly with it. Review these limitations carefully.

- BlueXP backup and recovery for VMs does not support Amazon FSx for ONTAP's automatic daily backups.
- The maximum limit of datastores that can be mounted are four.
- BlueXP backup and recovery for VMs shows secondary location twice if snapshot locking is enabled. This issue is fixed in ONTAP 9.14.1RC1, ONTAP 9.13.1P4 - ONTAP 9.13.1P5, and ONTAP 9.12.1P8 - ONTAP 9.12.1P9.
